Honourable S. Thangapandian sir,

I need Interstellar Space Travel Permission, my All Projects & desires implementation. I don't have family (members), I am alone, I want to live new atmosphere place with wife Harika Mekala +91 9440345397. My www.mout.co.in, website for gathering all people for funds and works.

All Countries Honourable Constitutions make by Human, not by God, every honourable Constitution copied by another honourable Constitution and modified for those conveniences. The Original Constitution was "Sri Seetha Rama Rajyam" [End Stage of Constitution(s)], every Constitution should reach this Point, and more ever that our all Honourable Constitutions make for our Human only, but really we are not only living specie on our mother planet earth, so we recognise other species, atmosphere, climate, earth and unwanted asteroids collision also. Our Mother Planet Earth becoming Mars. So no one specie may not survive. Total demolished. I won't like this.

What is in our hands? "Shivaiah aazna lenide cheemaina kuttadu (everything happens is God's decision)", "Shiva Keshavulaku bhedam ledu (No difference between Shiva and Vishnu, both are equal)", "Chavu Puttukalu Dyvadhinamulu (Death and Birth are God's decisions)"

"All Species in Universe Space, have same Feelings, same Families, and those Languages, those living Places and lives all together"

"Practically Implement anything, may arises lot of Difficulties, Problems, but if we should not Start how can we reach The End"

"Happy Living Principles: Excuse other people mistakes, then you have capable the same by others, Help to other people, then you have capable the same by others & Follow Honesty, Responsibility, Loyalty, Kindness, Obedience Love and Ethics"

I am ready to make these below along with you all, kindly help me. Thanks.
